

TFD-1261

INTELLIGENT ADDRESSABLE HEAT DETECTOR
(FIXED HEAT AND HEAT RISE) WITH BUILT-IN ISOLATOR

Installation & User Manual

Release Date: 04/01/2021
Rev:01

Critical Warnings

General

- ✓ Read this manual with care before operating the device and keep it for further reference.
- ✓ Comply with all warnings and measures provided in the manual. Follow all respective operation and usage instructions.
- ✓ Keep the devices away from water and humidity.

Ambient Conditions

Do not operate the device under extreme temperature conditions that fall outside the following values.

Temperature: Between -10°C and +55°C

Relative Humidity: Max. 95% RH

Service

Do not attempt to repair the device on your own, you may be exposed to electric shock in case you open the device housing.

Contact your dealer or authorized service in case of a failure. Technical interventions to the device must be carried out by qualified personnel of authorized service.

Warning: Do not attempt to take the card out of its plastic protection. It is sealed solely for your safety. Users must avoid intervention.

Failures That Require Service Intervention

Contact your authorized service or dealer in case of a failure or in following cases.

- ✓ If the power line or plug is damaged,
- ✓ If any liquid has leaked or a substance has fallen into the device,
- ✓ If the device is exposed to water or rain,
- ✓ If the device is dropped or the housing is damaged,
- ✓ If there is significant performance change in the device,
- ✓ If the device is not operating normally according to the operating instructions in the user manual

Call the service since erroneous operations may cause further failures.

What You Can Do On Your Own

Do not attempt to repair the device on your own since you may be exposed to electric shock in case you open the device housing. Contact your dealer or authorized service in case of a failure. Technical interventions to the device must be carried out by qualified personnel of authorized service. The device must be cleaned with a dry cloth. No chemical must be used for cleaning purposes.

Handling and Transportation

The device must be handled with care in manner that it does not get exposed to impacts and liquid influx. The damages that may occur during improper handling are out of guarantee.

Human and Environment Health

This device does not contain any chemical or biological substance that may harm human health.

General Features

- ✓ Operation manner of the heat alarm that can be selected from control panel;
 - The alarm can be produced at 55°C within this frame if Detector fixed heat is selected.(A2S)
 - The device will operate in heat increase mode within this frame if Detector heat increase is selected.(A2R)
- ✓ Denial of temporary signals that may be perceived as alarm
- ✓ Smart line protection that will prevent the regional line from failure in alarm situations
- ✓ External notification light connection means
- ✓ Two LED's used for state indication purposes
- ✓ 15s starting time
- ✓ Compatible with TFA-0120 Universal Detector Base.

Technical Specifications

Power Input	18V(min) – 32V(max)
Average (Quiescent) Current Consumption	80uA (@32V)
Maximum Alarm Current	3mA (@32V)
Maximum External Device Current	10mA (@32V) – (2K2 resistance limit)
Alarm Levels (appr.)	H: 0.12, M: 0.15, L: 0.18 dB/m
Operating Temperature Range	-10°C ~ 55°C (14°F ~ 131°F)
Humidity	95% RH (max)
Size (mm)	Ø110, h42
Housing Material	White Color, ABS Plastic
Attached Cable Cross-section	0.4mm ² ~ 1.5mm ²
Weight (wit base / without base)	183 gr / 125 gr
Starting Time	15 sec
Isolator	
Average Current Consumption (Normal Op.) @24V	15uA
Vmax.	32V
Vnom.	28V
Vmin.	15V
Vso_max.	18V
Vso_min.	9V
Vsc_max.	5V
Vsc_min.	0,7V
Ic_max.	0,5A
Is_max.	3A
IL_max.	0,026A
Zc_max.	0,026Ω

Indicator LED's

	Blue LED	Red LED	Yellow LED
Any error situation (Pollution etc..)	Blinks with 4 sec. intervals	X	X
The device is in normal operation mode (can be turned off.)	Blinks with 20 sec. intervals	X	X
Alarm state	X	Constant	X
Short circuit state	X	X	Constant

Terminals

No. 1	NEG.(-) supply input
No. 2	NEG.(-) supply output, NEG. (-) input of parallel notification light
No. 3	POS. (+) input of parallel notification light
No. 4	POS.(+) supply input, POS.(+) supply output
No. 5	Earth connection

Warning: The product operates only with Teknim TFP-121x, TFP-122x ve TFP-123x Intelligent Addressable Fire Alarm panels.

Installation and Connection

- Turn (1) the detector head counterclockwise to the short line and pull (2) it up to disassemble from the base.
- Mount the base part by using the mounting place shown (2).

- Make the cable connections according to the following diagram. Make the connection by observing that the polarity of Leg No. 4 is (+) and Leg No. 1 is (-), and then by connecting (-) pole from No 2 and (+) pole from No. 4 of the current detector to No.1 of the next detector.
- Use the connections No. 3(+) and 2(-) for the parallel notification light.
- Install the detector head into its place. Make sure that the line on the head piece is aligned with the long line on the base.

- Energize the detector. The LED on the detector will blink blue light once in every 20 seconds in the state without an alarm in order to indicate that the device is in operation. (This feature may be turned off from the panel)
- Make the chasis(earth) connection of the cable continuously over the Leg No. 5 between the loop output and the last detector.

Test

Heat Test:

Providing an air flow of appr. 70°C is sufficient for the detector test.

- Start the hot air flow and check the temperature.
- Apply the hot air into the detector. The detector must produce the alarm within 30 seconds.
- Check to see whether the red LED's light continuously. Reset the detector from the panel.
- The system may be activated after the test is performed.
